SUMMARY

Experienced Application Developer with a strong track record of delivering scalable software solutions. Passionate about solving real-world problems through clean code, smart architecture, and teamwork. Continuously exploring emerging technologies—especially AI—to build smarter, more innovative products that drive business success.

EXPERIENCE

React Native Developer (Remote)

Devorium　　📅 08/2022 - Present　　📍 Lahore, Pakistan

Devorium is a software development company committed to delivering high-quality web, mobile, and software solutions. With a focus on innovation and technical excellence, Devorium collaborates with global clients— including reputed brands— to develop intuitive, reliable, and scalable products. The team emphasizes research-driven development and continuous improvement to stay at the forefront of technology

- **Developed and maintained cross-platform mobile applications** using React Native, delivering seamless performance on both iOS and Android.
- **Integrated AI-powered features** such as smart notifications, recommendation engines, and Zendesk-based customer service chatbots to enhance user engagement and support.
- **Collaborated with remote teams** to build scalable mobile solutions for global clients, including projects for reputed brands.
- **Improved app performance and UX** by optimizing components, managing state efficiently, and implementing clean UI/UX design patterns leveraging Cursor AI editor for faster, AI-assisted code refinement.
- **Worked on API integrations** including RESTful and GraphQL services, ensuring smooth data flow between frontend and backend systems.
- **Implemented automated testing and CI/CD pipelines** using Detox and Maestro for end-to-end testing, ensuring faster, more reliable, and bug-free mobile app releases.
- **Contributed to technical research and prototyping**, exploring AI SDKs and ML libraries for mobile to stay ahead of market trends.
- **Participated in code reviews and knowledge sharing**, maintaining high development standards across the team.

Mobile Application Developer

**CarSwitch Arabia**　　📅 08/2021 - 08/2022　　📍 Lahore, Pakistan

CarSwitch Arabia is a leading online platform for buying and selling certified used cars in the Middle East. The company simplifies car transactions with a tech-driven approach, offering inspection, pricing, and end-to-end service management.

- **Developed and maintained the CarSwitch mobile app** using React Native, delivering a smooth cross-platform experience for car buyers and sellers.
- **Enhanced user interfaces and workflows**, improving customer engagement and streamlining the car listing and purchase process.
- **Collaborated closely with the product and design teams** to implement new features, such as in-app car inspections and booking functionalities.
- **Integrated third-party services and APIs**, including payment gateways and location services, to enhance app functionality.
- **Worked on app performance optimization**, reducing load times and ensuring consistent performance across devices.
- **Contributed to debugging and refactoring legacy code**, improving maintainability and reducing technical debt.

SKILLS

JavaScript　React Native　React

Redux　TypeScript　Node.js　MySQL

MongoDB　GraphQL API integration

Version control (Git)　Agile methodologies

Debugging techniques

Automation E2E testing (Detox & Maestro)

Xcode & Android Studio　Flipper

Smartlook Integration

KEY ACHIEVEMENTS

💎 **Development of Smile's mobile app**

Smile.com.au – smile.com.au: **Contributed to the development of Smile's mobile app**, helping Australians access affordable dental care through a nationwide membership-based platform.

💎 **Leading the development**

GiggleGrove – *(In Progress)*: **Leading the development of a nursing home child activity tracking system**, enabling caregivers to monitor children's activities, growth, and daily progress in real time.

💎 **Building a next-gen e-commerce platform**

Hewdord – *(In Progress)*: **Building Hewdord, a next-gen e-commerce platform**, focused on streamlined product browsing, cart management, and seamless user experience.

💎 **Collaborated on the Squire mobile app**

Squire – gosquire.com: **Collaborated on the Squire mobile app**, a premier barbershop management platform for booking, payments, and customer engagement.

💎 **Build major features**

CarSwitch App – carswitch.com: **Worked closely on the CarSwitch mobile app**, simplifying the buying and selling of certified used cars in the Middle East with integrated inspection, pricing, and end-to-end transaction management.

EDUCATION

Masters in Computer Science

Virtual University of Pakistan   📅 2022 - 2024

- Built a solid foundation in **programming, data structures, OOP, and database management**.
- Gained **practical coding skills** through academic projects, focusing on web and mobile development basics.
- Developed a **problem-solving mindset and adaptability to new technologies**.
